National Geographic Maps - Reference : Asia Classic, laminated (National Geographic Reference Map) before purchasing it in order to gage whether or not it would be worth my time, and all praised Asia Classic, laminated (National Geographic Reference Map):

1 of 1 people found the following review helpful. Watch out what you buy. The descriptions do not always describe what you think you are getting.By alligatorThe clear plastic sleeve is not a cylinder, just a thin sleeve of plastic. The map has lumpy longitudinal ridges that will not come out. Whatever way this map was made and packaged, it is not good! The map was not crushed in the long box it was shipped in.I have a map of Eastern Europe (same size) from another seller. It was not lumped. It has a sturdy, reusable plastic tube for storage.0 of 0 people found the following review helpful. Great!By CustomerGreat quality and mint condition!0 of 0 people found the following review helpful. Who knew so many countries are in Asia !By jiveshiMap is terrific. So much to see. Well made. Easily placed on the wall.

National Geographics map of Asia is as attractive as it is functional. The entire continent is rendered in the Classic

style with colorful, clearly defined international borders, shaded relief, and easy-to-read fonts. Place names, bodies of water, airports, major roadways, and railroads, as well as cartographic patterns used to depict sand, lava fields, swamps, dry salt lakes, intermittent lakes, salt deserts, glaciers, and areas below sea level are shown as well. Ocean features and currents, as well as depth curves and soundings add context to the continent's extensive coastline and the diverse human populations that inhabit those shores and surrounding islands. An inset map provides detail of New Guinea and Bismarck Archipelago. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:13,812,000 Sheet Size = 33.25" x 38"

About the Author Founded in 1915 as the Cartographic Group, the first division of the National Geographic Society, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world. All proceeds from the sale of National Geographic maps go to support the Society's non-profit mission to increase global understanding and promote conservation of our planet through exploration, research, and education.
