National Geographic Maps - Reference : Asia Executive [Laminated] (National Geographic Reference Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Asia Executive [Laminated] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Wonderful. By Joshua Great map as always by National Geographic, the details and aesthetic nearly unmatched. I HEAVILY recommend getting this laminated version, the increase of price is definitely worth it, it keeps it safe and is overall much more durable. It may not be that much of a problem if your planning on framing it, but I would still recommend it. Awesome product! However, this map didn't ship until about a month after I ordered it, but I can see why as it was out of stock for a short while. 0 of 0 people found the following review helpful. Great display map. By L Nash Great laminated map. I've just gotten mine framed and it looks fabulous and would make a great gift. I would highly recommend. 0 of 0 people found the following review helpful. Wonderful Map! By Molly I love the fact that it is vintage looking but I also love that it's laminated! I can use expo markers directly on the map!

National Geographic's Executive map of Asia uses an antique-style color palette that fits with any decor. This stunning wall map covers the entire continent, with shaded relief, colorful international borders and infrastructure features such

as roads, railroads, airports and canals. Also displayed are glaciers, areas of sand, lava fields, intermittent and dry lakes, swamps and areas below sea level. Country capitals and other cities are labeled with easy-to-read fonts. Oceans, seas and other major bodies of water are shown with depth curves. An inset map provides detail of New Guinea and Bismarck Archipelago. The English translation for many geographic terms is shown in a user friendly index. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:13,812,000 Sheet Size = 33.25" x 38"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
