Joan Blaeu : Atlas Maior before purchasing it in order to gauge whether or not it would be worth my time, and all praised Atlas Maior:

0 of 0 people found the following review helpful. The book arrived in great condition, thanxBy RickI've only glanced at it so far being busy through the holidays and all.The book arrived in great condition, thanx.4 of 4 people found the following review helpful. Incredible book!By JMULFor those of us who love ancient maps and the history of cartography, this book brings us the possibility of having a facsimile of the turning point, master-piece of the golden age of cartography. I'd been looking for this book in my country with no success, I'm very happy to have it in my collection. Regards from Buenos Aires, Argentina.0 of 0 people found the following review helpful. Five StarsBy Customergood

"The greatest and finest atlas ever published" The finest and most comprehensive baroque atlas was Johann Blaeu's exceptional Atlas Major, completed in 1662. The original 11-volume Latin edition, containing 593 maps, put Blaeu ahead of his staunch competitor, mapmaker Johannes Janssonius, whose rivalry inspired Blaeu to produce a grandiose edition of the largest and most complete atlas to date. Covering Arctica, Europe, Africa, Asia, and America, Blaeu's Atlas Major was a remarkable achievement and remains to this day one of history's finest examples of mapmaking. This reprint is made from the National Library of Vienna's complete, colored, gold-heightened copy, thus assuring the best possible detail and quality. The book's introduction, by the University of Utrecht's Peter van der Krogt, discusses the historical and cultural context and significance of the atlas; Krogt also provides detailed descriptions of the maps, allowing modern readers to fully appreciate Blaeu's masterwork.

"The greatest and finest atlas ever published" Koeman I, BI 56"About the AuthorPeter van der Krogt, the leading expert on Dutch atlases, is researcher of the Explokart Research Program for the History of Cartography of the Faculty of Geosciences at the University of Utrecht. Since 1990 he has been working on the carto-bibliography of atlases published in the Netherlands, Koeman's Atlantes Neerlandici, and the compilation, in co-operation with Erlend de Groot, of an illustrated and annotated catalogue of the Atlas Blaeu-Van der Hem, the most important collector's atlas.
