Keith Hockton : Atlas of Australian Dive Sites before purchasing it in order to gage whether or not it would be worth my time, and all praised Atlas of Australian Dive Sites:

Australia, one of the world's most desirable tourist destinations, continues to dazzle travelers by its sheer diversity and

its amazing, unique flora and fauna. It also boasts some of the most unbelievable diving around its entire coast, several inland cave systems and the Great Barrier Reef. This book, flexi-bound and ideally sized for the traveler, reveals hidden and popular dive sites including wreck location, reefs, snorkel sites and posts where you can see sharks, sponge gardens and coral. Also includes clear maps; advice for marine protection and collection; tides information; evaluating a dive operator; emergency diving and more. An accredited PADI Master Scuba Diver Trainer, Keith Hockton has more than 14 years of diving experience.
