National Geographic Maps - Trails Illustrated : DuPont State Recreational Forest (National Geographic Trails Illustrated Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised DuPont State Recreational Forest (National Geographic Trails Illustrated Map):

0 of 0 people found the following review helpful. At last! National Geographic quality for a (relatively) small State Recreation Forest! By MCK This is all you have come to expect from National Geographic maps; plenty of useful information, including trail-segment distances marked right on the depicted trail. Scale is 1:22500. In addition to trail listings, the map has a special table of waterfall locations. The only reason I didn't give this "5 Stars" is that the map legend DOES NOT show the Grid-to-Magnetic Angle (for those of us who use a compass to navigate. I am certain this is an oversight which (I trust) will be corrected in future printing(s)) 0 of 0 people found the following review helpful. Five Stars By Customer Good Quality and Informative!

Waterproof Tear-Resistant Topographic Map In the late 1990's the Friends of DuPont Forest, a volunteer service organization, started acquiring land for the first State Recreation Forest in the country. After years of work acquiring land the DuPont State Recreation Forest now includes over 80 miles of trails that cover an intricate trail network. Most of these trails are open to hiking, equestrian, and mountain bike use. A few have been designated as hiking only to give hikers an opportunity to use trails at a slower pace. Each trail has a difficulty rating and mileage marked on the map, no need to look up this information in a separate table. One of the main draws of the State Recreation Forest is the abundance of waterfalls. There is even a waterfall table to help locate these amazing features and help with planning. The back side of the printed map includes a group of selected loop trails for all abilities from beginner to expert. Each suggested loop has a trail profile that clearly shows the climbs and descents as well as trail crossings and other waypoints along the way. The loops also include turn by turn directions and commentary on interesting landmarks along the way. Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Other features found on this map include: DuPont State Recreation Forest. Map Scale = 1:22,500 Sheet Size = 26.25" x 19.5" Folded Size = 4" x 7.5"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
