**National Geographic Maps - Reference : Earth at Night [Tubed] (National Geographic Reference Map)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Earth at Night [Tubed] (National Geographic Reference Map):

1 of 1 people found the following review helpful. LOVED IT By B. Pryde It was wonderful... GREAT Buy it if you are looking for something like this... GREAT color and so neat! It went into my son's room and it too loves it! 0 of 1 people found the following review helpful. Two Stars By Glenn W. Love the poster, but mine arrived damaged.

This intriguing map reveals in stunning detail the pulsating lights of the Earth at night. See where populations are most and least concentrated. The rare view is a composite image made by three satellites on cloud-free nights over a one-year period. In addition to showing lighted areas of the Earth, this map also features where fires rage and natural gas burn-off and night fishing locations. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Sheet Size = 35" x 22.25"
