ONE OF THE VERY BEST PUBLISHED BOOKS OF THE LAST FEW DECADES !!!By Ian MoodieTHIS remarkable ATLAS, EARTH:THE WORLD ATLAS (CONCISE), published by MILLENNIUM HOUSE is indeed EPIC IN SCOPE, in size, it's most massive, over ten pounds heavy, almost 580 high quality pages, in photographs, it's most breathtaking, in essays it's most informative and in MAPS, it's most beautiful, perhaps the best maps ever in terms of detail, color and relief...an absolute pleasure...just to look at.THOUGH it is officially an ATLAS, it is much more. it is also a Geographical and an Earth science reference book, so much information is here, every topic is presented here, from the core of the EARTH to all life and the cycles is

made plain. This BOOK/ATLAS is truly encyclopedic !!.EARTH is also a social studies BOOK, topics such as RELIGION, POLITICS, HISTORY, ECONOMICS, STATISTICS, CULTURE and GOVERNMENT of every single nation is explained in absolute clarity, once more this stunning ATLAS/BOOK can be enjoyed by all. EARTH:THE WORLD ATLAS(CONCISE) is indeed complete.THE layout is different from other ATLASES, after the thematic pages, it is then planned continent by continent, a feature which makes it truly unique.I notice one major drawback...the way how the book is bonded makes it a tad challenging to see the maps where the pages meet, the thickness of the book adds to it..entries on maps and map plates are a bit limited as well..but what is presented herein is most excellent..(there is another very exclusive/super,limited edition:EARTH:BLUE WORLD ATLAS, with much more MAP PLATES but it's going to set you back \$4000.00 to \$6000.00)Overall, EARTH:THE WORLD ATLAS (CONCISE) is indeed a most beautiful treasure of a Book, so fantastic to own, it is absolutely perfect for the chaired traveler, the entire PLANET/WORLD is right at your very fingertips...this is a stroll across the continents...accolades could go on for ever...you just have to own a copy and behold stupendous magnificence for yourself. Then you will surely agree that EARTH:THE WORLD ATLAS(CONCISE) is certainly one of the very best BOOKS published in the last few decades.1 of 1 people found the following review helpful. Best atlas ever!By Donna Gray-Van BurenI have been looking for an atlas that combines both maps and comprehensive explanations of history, cultures, religions, politics and so forth of all regions. It is exactly what is needed to explain why the earth is what it is today. I am using this atlas as a tool for preparing my young kids for the national bee. This is money well spent if you're home schooling your kids or want to include more history and geography into your child's current school curriculum. It also makes me a more savvy adult.2 of 3 people found the following review helpful. Outstanding Pub for the MoneyBy John V. BrahanaAesthetics are outstanding; cartography very well conceived; enlightening text; spectacular photos; beautiful book. I bought two more as gifts after seeing my personal copy.

The world s largest atlas, at 24 inches by 18.5 inches, this exquisite limited edition volume takes cartography to a new level. For the map enthusiast, the collector, the armchair traveler, or for those who enjoy luxury, this beautiful leather-bound edition is a must-have. Only 2000 of these books have been produced, each one individually hand-numbered.The 160 pages of highly detailed, award winning maps, produced by a team of more than 100 international cartographers, geographers and oceanographers are the foundation of this book. Each of the countries of the world is described and illustrated in detail with focus on its geography, history, culture, and unique features. Over 750 photographs and illustrations complete the story.

EARTH represents absolute commitment to excellence. This atlas is a document that will last for future generations thanks to the unwavering focus of the publishing team on delivering the very highest quality possible. Most importantly, we share the goal of turning ambitious vision into a reality.I hope you enjoy EARTH. It is a remarkable atlas, giving a breathtakingly comprehensive view of our planet and of its resources. --H.E. Sultatan Ahmed Bin Sulayem, Chairman, Dubai WorldAbout the AuthorCharles F.
