Riley Great map with sufficient detail for me.

Ecuador 1:650,000 Galapagos 1:1,000,000 Travel Map, waterproof, GPS-compatible REISE This map is waterproof and tear-resistant, highly durable in humid conditions of Ecuador, double-sided to provide the best balance between a good scale and a convenient sheet size (size 100 x 70 cm / 39.5 x 27.5 in), with topographic and tourist information. The country's topography is presented by altitude colouring with contours, spot heights, mountain passes, and names of mountain ranges - volcanoes are highlighted. The map also shows mangroves, swamps, and seasonal rivers and lakes. Internal administrative boundaries are shown with names of the provinces. The Galapagos Islands are presented as an inset at 1:1,000,000, with plenty of names of various geographical features. Road network includes unsurfaced local roads and 4WD tracks, gives driving distances on main roads and locations of petrol stations, and shows border

crossings. Local airfields are also marked. Symbols highlight various places of interest, including national parks and protected areas, UNESCO world heritage sites, churches and archaeological sites, campsites, beaches and diving or surfing locations, etc. Oil well and pipelines are also marked. The map has a latitude and longitude grid at intervals of 30' and an extensive index of localities. Multilingual legend includes English, high quality German cartography.
