**From Insight Guides : Ecuador Galapagos Insight Fleximap (Fleximaps)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Ecuador Galapagos Insight Fleximap (Fleximaps):

It is made out of plastic rather than that super strong paper like material that I thought it was made from. I fear that repeated folding and refolding is going to break the plastic. 2. natural features are not indexed--rivers. 3. no longitudes or latitudes are shown (this absolutely blew my mind. I had never heard up printing a map without these. Makes the map useless to use with a GPS.) What I do like. 1. nice scale 1:1,000,000. 2. well printed 3. roads are well shown. 6 of 6 people found the following review helpful. Good map but not complete By Blake Hart This map is a good and somewhat in depth map for basic knowledge of Ecuador. But it is nowhere being enough. It doesn't even have an insert of the city of Guayaquil, which is the largest city in the country. However it is a decent, sturdy map that serves as a good starting point.

FlexiMaps are innovative maps that combine durability and convenience with accuracy, utility and readability. With state-of-the-art technology, FlexiMaps feature detailed city, street and road maps clearly marked with all the sites and services of particular interest to travelers. Text and photographs offer a wealth of valuable tourist information on transportation including "10 sights you shouldn't miss", plus information on transportation, important telephone numbers, emergency services and more. For the international traveler, visa and currency information is also available.
