With this map, I could always find my way to where I was going. I am THRILLED with my purchase of the Eicher Delhi city map (and the Mumbai one too).4 of 4 people found the following review helpful. Very accurate and completeBy T UIf you are looking for map for delhi, this is the best thing money can buy. I was born in delhi and has lived for last 27 years but even then I found the map very helpful and keeps it in my car all the time.Eicher have done a good job with both the layout and accuracy. They have one large map that shows the entire city and then about 50 small maps dividing the city in that many parts. This allows one to first get an overall view of the route one is planning and then zoom on to the exact street. The resolution is good enough to locate the exact plot in most localities. The accuracy is so good that I am yet to notice a single mistake.The fact that they have also included maps for adjoining suburbs of delhi (like noida, gurgaon, faridabad and gaziabad) helps a lot. I actually used the map to plan my home purchase in NOIDA to compare locations (in context to nearby markets, schools, large roads) of places I was considering to buy.The only complaint I have is against the binding of the book. The pages have a tendency of getting a little loose after frequent handling (or may be I use it a little TOO frequently). In any case, I expect a map book to be able to take a little more heavy handling than this one.Nevertheless, where it matters, in

details and accuracy - this book scores and I have no hesitation in giving it five stars.
