The internal drive that propels searchers to focus solely on their, often elusive, prize and immersion into exotic locations and treacherous conditions has been beyond my comprehension. Expeditions allows the reader to accompany the treasure hunter on his search. I found myself holding

my breath when reading certain parts of the book. I learned what drives the searcher. I have a new appreciation for the stamina required. I look forward to the next book. 1 of 1 people found the following review helpful. Wow...more than I expected...what a ride..By THOM WELCH I've always liked murder mysteries, thrillers that have you on the edge of your seat as they try to put the pieces to a puzzle together, and hair-raising dangers along the way this book by Lee Elders has all these elements and kept me turning the pages, excited to see what new discovery or danger was coming next in trying to sort out the mysteries..and the real treasures like other readers have commented, you cant put it down, and if you have to work or run an errand (or stop and sleep) it stays on your mind until you get back to it. I found it absolutely gripping, an Indiana Jones type dangerous search into true wild hidden treasures and mysteries buried in the unmapped jungle and dark regions dominated by the legendary headhunters few have ever seen. This book is one wild ride! Youll never forget it particularly because its true and not fiction. Lees experiences are probably where Hollywood writers got the idea of Indiana Jones not kidding here..youll see what I mean. Also this is the book for you if you have ever pursued reading about real expeditions into dangerous mysteries, unmapped jungle regions, in search of archeological treasures or jeweled precious-metal idols and statues of a long lost civilization, etc. Youll really love it if youve actually participated in dangerous expeditions of various kinds yourself! But if not, well, this is the next best thing for years to come wow is all I can say didnt expect to want to say wow..but Im sayin it.. 0 of 0 people found the following review helpful. An Amazing Treasure Hunter True Story! By Brendan Moran Amazing book! Great story about a real person hunting for treasures in the 60's/70's of the . While Elders writes a chronological history of his expeditions and experiences, you find yourself actually walking in the faced with the dangers of what you know from the history books, and the super natural which Elders describes having witnessed and experienced. He leaves readers with their own aspirations of whether they want to go after the treasures themselves with a map at the back of the book. After reading the book, I was left fascinated and also had questions about certain events and descriptions that may have been unclear, which he personally answered over a few emails. I would highly recommend if you are a treasure hunter at heart, a great read!

Journey from the banks of a prolific gold bearing river named Hell to a century-old, last will and testament whose riddle led the Catholic Church and British and Colombian explorers to an uncharted area of Ecuador in a futile search for high-grade emeralds. EXPEDITIONS propels you on a thrilling journey into Lee Elders' search for this treasure and the world of the Untsuri Shuara, the headhunters of the Western Amazon. In the mid-sixties, the adventure of discovery was the enticement that drew Lee to this wild lawless land; the super natural world of the Shuara that live in a mystical realm of ayahuasca-induced visions where the ethereal world is encased within our third dimensional reality. Lee's search for the Green Fire spanned years that were filled with insurmountable odds. Unpredictable weather, raging rivers, precarious jungle trails and dangerous predators proved formidable opponents, but those and other perilous obstacles didn't deter him. However strange or incredible some of the incidents may seem this is a true story.
