Outstanding series By Bermudiana The four books which make up the "Explore the National Marine Sanctuaries with Jean-Michel Cousteau" series are treasure-houses of information relating to the United States' diverse and fascinating coastlines. Sumptuously illustrated with spectacular photographs, the books look at why each stretch of coast has been designated a marine sanctuary, detail the key species of each area,

touch upon emerging environmental issues, list research which is being conducted there, and provide information to enable visitation of the sanctuary. The books are invaluable to eco-tourists, people who live along the coasts, and in schools and colleges. They are also sources of great pleasure to anyone who loves the environment and marine life. Jean-Michel Cousteau, editor Maia McGuire and Ocean Publishing are to be congratulated on a beautifully presented, quality series. Explore the West Coast National Marine Sanctuaries with Jean-Michel Cousteau (Explore the National Marine Sanctuaries with Jean-Michel Cousteau) 2 of 2 people found the following review helpful. A terrific guide to America's ocean treasures. By The Captain. As a former oceanographer and documentary filmmaker I have a passion for what Jacques Cousteau called the Silent World. But few books can truly capture the experience of underwater exploration. This guide book by Jean -Michel Cousteau is the happy exception. Many of our marine sanctuaries are not easily accessible to the casual diver. Cousteau's book is the next best thing to being there. The photography is stunning, the descriptive passages insightful. And for those who wish to venture out (and down) to America's ocean treasures it's a very practical and detailed guide.

Based on the famed French explorers film series, Jean-Michel Cousteau: Ocean Adventures, these are the definitive guides to America's thirteen National Marine Sanctuaries and its one Marine National Monument. Each of the four books conducts a grand adventure through one of the four regions of the National Marine Sanctuary system, combining engaging descriptions, stunning four-color photography, and behind-the-scenes stories from the Ocean Futures Society expedition team. Insightful inquiries into the health of the world's oceans are provided along with an overview of several incredible underwater treasures. Conveying the beauty of the ocean and the specific measures being put into effect to preserve it, this inspirational collection also features detailed, practical information for planning visits to the sanctuaries.

"Jean-Michel [Cousteau] is the authoritative servant on the sea for our generation and future generations. This incredible series will be beneficial in getting the word out about the importance of protecting our oceans and the marine life that call it home." Robert Lyn Nelson, artist and environmentalist
