my time, and all praised Explorer's Guide 50 Hikes in Northern New Mexico: From Chaco Canyon to the High Peaks of the Sangre de Cristos (Explorer's 50 Hikes):

By KrykieI moved to Northeastern New Mexico from Colorado, and was interested in hiking. There are few books on the area, so I bought this after surfing (not available locally, now I know why!)The hikes listed are probably real hikes. However, this book is no aid in helping you find the trailheads or understand the trail. For example, to get to a trail head, the author gives mileage ticks from a town -- too bad if you are coming from the other direction; there is no way to find the tenth/mile guides he describes. In addition, the book touts "topo maps". Well, the topo map is a little cut out of a topo map -- no grid coordinates, no main features. Just contour lines and a blacker line going through the cut out grid. No way to determine where the grid is.To hike the trails in this book, you will need to visit the ranger offices and get real maps (which have trails marked on them) anyway. Not a useful book at all for someone who wants to actually put boot on the ground; but a good book for someone that just wants to sit around and read about it.

By Richard G. ProsapioIf I can just motivate myself to get that old backpack on this will be the first thing I read before I step out the door.

By Paul RicheA competent, if limited, survey of hikes in Northern New Mexico.If you are going to be based in Taos, a good idea!, I recommend Cindy Brown's 'Taos Hiking Guide' as a 'vade mecum' for getting you into this area.On a broader front, '100 Hikes in New Mexico' is also an excellent sampler, but there is nothing like a decent set of hikes specific to the area of immediate interest; the United States Forest Service is a rich source for trail info on their lands, in the form of trail details sheets, with excellent (usually) topos, to scale, on the reverse of the essential data.

High on the desert plateau, awash in the light that has inspired artists over the centuries, pathways into some of the most beautiful and mystical lands await. This is your guide to more than 50 spectacular and sublime walks, hikes, and backpacking adventures accessing the Jemez and Sangre de Cristo mountains, contorted volcanic formations, and striated canyons. Move across the expansive Valle Grande; pierce the clouds on Wheeler Peak; wade through a sea of wildflowers along subalpine lakes in the Pecos Wilderness; walk with the ancients as you explore ruins left by American Indian, Hispanic, and Anglo inhabitants in places like Chaco Canyon and Bandelier National Monument. 50 black-and-white photographs, 51 maps
