National Geographic Maps - Trails Illustrated : Mammoth Lakes, Mono Divide [Inyo and Sierra National Forests] (National Geographic Trails Illustrated Map) before purchasing it in order to gage whether or not it

would be worth my time, and all praised Mammoth Lakes, Mono Divide [Inyo and Sierra National Forests] (National Geographic Trails Illustrated Map):

4 of 4 people found the following review helpful. High quality
By Zach B. (copied from my review of the NW version of Yosemite maps)
I was very surprised by the quality. When I first opened the package, I was ready to call and complain because the material felt just like normal paper. I re-read the description on the store page -- yep, water-proof, tear resistant, etc. I took that as a challenge and put the seemingly normal paper map under the faucet and blasted it -- only to watch the water glide right off. So I grabbed the corner of the map and tried to rip it, and it stretched a little after applying pressure. Whoa. I don't know what these maps are made of, but I'm impressed. The color is great too, I'm sure the maps themselves are accurate because they are highly rated in that regard when I checked elsewhere. I didn't expect the quality of the actual material. You want these maps.
0 of 0 people found the following review helpful. Great planning Tool
By L. Borreson
I like to previsualize any hike I may like to take at any National Park I plan on visiting. These maps become one of my study tools to do just that. In the case of this map and its counterparts, I can look at distances and elevation differences for the areas I'm interested in going. For a trip I will be going on in 2 months, I will only be in Yosemite for 3 days and already have over a week's worth of ideas. When I get back home with a few thousand pictures and GPS tracks, I can use the map to relive the experience and possibly plan for a future trip.

By NaNaT
This is an amazing and more-than-welcome trail map. My only wish is that the group of central Sierra maps would fit together like puzzle pieces. I happen to be location challenged (I.e. I never quite know where I am) and need the matching of scale and place in the big picture to move from one to the next.

Waterproof Tear-Resistant Topographic Map
Explore the magnificent alpine landscape of Mammoth Lakes, Mono Divide with National Geographic's Trails Illustrated map. Expertly researched and created in partnership with local land management agencies, this map features key points of interest including John Muir, Ansel Adams, and Dinkey Lakes wilderness areas; Devils Postpile National Monument; and the northern portion of Kings Canyon National Park. Loaded with helpful information on wilderness camping, safety tips, and regulations, this map is an invaluable tool for casual visitors and avid adventurers alike.
The Mammoth Lakes, Mono Divide Trails Illustrated Map can guide you off the beaten path and back again with miles of mapped trails including portions of the Pacific Crest and John Muir trails. The trails are clearly marked for their usage, and mileage between intersections is noted. Road types are differentiated as well, so you know if the route you choose is a paved, dirt, four-wheel-drive, or high-clearance road. The map base includes contour lines and elevations for summits, passes and some lakes. A variety of recreation features are noted, including campgrounds, trailheads, interpretive trails, boat launch sites, horse pack stations, and more. Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation.
Other features found on this map include: Ansel Adams Wilderness, Courtright Reservoir, Dinkey Lakes Wilderness, Inyo National Forest, John Muir Wilderness, Kings Canyon National Park, Lake Crowley, Lake Thomas A Edison, Mount Darwin, Mount Goddard, Mount Morgan, Mount Powell, Mount Ritter, Nelson Mountain, Ritter Range, Sierra National Forest.
Map Scale = 1:63,360
Sheet Size = 37.75" x 25.5"
Folded Size = 4.25" x 9.25"

About the Author
Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
