Not at all waterproofBy Just Smart GuysThe detail of the map was good, and the topography lines helped us know what was ahead (how big of a hill we had to climb), but I would say it was far from waterproof. It got a little bit damp and the ink ran right off the page. The section we were hiking became a giant white spot like nothing had ever been printed there. I would rate it better, but if you are hiking along a river and the map can't get wet, that is a problem.0 of 0 people found the following review helpful. ToughBy CoreyNice water and tear resistant map. I have used and abused other maps int he National Geographic series and they held up well. I expect no less from this one.
