Juan Pablo Gardeweg : Mapa Chiletur Copec Zona 9: Tierra del Fuego y Antrtica before purchasing it in order to gage whether or not it would be worth my time, and all praised Mapa Chiletur Copec Zona 9: Tierra del Fuego y Antrtica:

Area 9: Tierra del Fuego, Antrtica On one side it encompasses 270 km (168 miles) from north to south of continental Chile, from Rio Grande in Argentina to Diego Ramirez Islands in Drake Passage. On the other side it has a complete map of the Antarctic continent scale of 1:5.000.000. Highlights: Beagle Channel, Ushuaia, Puerto Williams and Navarino Island, e Alberto de Agostini National Park and Cabo de Hornos. In Antarctica stand out Larsen and Wilkins Ice Fields, Weddell Sea, Aitcho Island, and the Antarctic military bases located in the southern Shetland Islands. Extended size: 100 x 70 cm (39 x 27.5 inches) More about Compass Area Maps Compass Area Maps are 18 touristic and road maps, divided in 9 products printed on both sides. They are printed on Stone Paper, mineral and ecological paper. It's very resistant, waterproof, anti-reflective and recyclable; which makes them very durable, unlike those printed on other papers. Their scale is 1: 400,000 , meaning that 1 cm. is equivalent to 4 km. The base used to construct them was made by Chile's Military Geographical Institute (IGM, from its name in spanish). Also, all routes georeferenced by the Ministry of Public Works were added to the map. They have an index and a grid system that allows you to quickly locate places of interest , towns and cities . They are also compatible with the satellite navigation system GPS (WGS 84). Everything described above was complemented by observation-based research and experience in the field, and by gathering additional data from different guides and other available tourist information. We are not

paid to advertise any of the places marked in our maps, what is shown has been chosen as objectively as possible.
