Barbara Taylor : Maps and Mapping: Geography Facts and Experiments (Young Discoverers) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Maps and Mapping: Geography Facts and Experiments (Young Discoverers):

0 of 0 people found the following review helpful. Five Stars By *bonnie williams* Wonderful resource that keeps kids interested and engaged. 0 of 0 people found the following review helpful. Great book for elementary ages By *Deanne Ridge* This book has lots of great info for mid-elementary age students. I love it and so do my kids. We will learn a lot about geography and map-reading this semester. 4 of 4 people found the following review helpful. hands-on projects By *M. Heiss* Great for summertime projects, and they don't need much help from mom. Some of the projects include: making point-to-point maps mapping the bedroom and another room in the house scaling an item larger or smaller making a map key making contour lines using grid references making a magnetic compass measuring angles (simple) map projections

This absorbing book covers the elements found on maps, including scales, contour lines, and the use of colors and

symbols.

About the Author Barbara Taylor is the author of more than a hundred informational books for children. Barbara has won numerous awards, including the American Association of Physics Science Writing Award and the Geographical Association Gold Award.
