Five Stars By Jay C Winrod great 3 of 5 people found the following review helpful. good book for learning map skills By calty It covers the basics, compass rose, intermediate directions, scale, title, longitude and latitude, hemispheres, symbols. Overall good book for beginner map skills. I teach special ed and you can't just photocopy and throw down on the kids desk. You have to teach and explain each concept in further detail. But the kids definitely come away with a better understanding on how to read maps when your done with the book. I use this for my 4th grade special ed class.
