Charles H. Hapgood : Maps of the Ancient Sea Kings: Evidence of Advanced Civilization in the Ice Age before purchasing it in order to gage whether or not it would be worth my time, and all praised Maps of the Ancient Sea Kings: Evidence of Advanced Civilization in the Ice Age:

0 of 0 people found the following review helpful. Recommended highly.By Warren H. Jensen Jr.Eye opener for sure !! Recommended highly.0 of 0 people found the following review helpful. Mapmaker, mapmaker draw me a mapBy CustomerWhen explaining how mapmakers determine centers for maps and go through the math to create different projections, the author should have presented intermediate illustrations and calculations to drive home the complexity involved in a more tangible form than the verbal descriptions provided.0 of 0 people found the following review helpful. Dated, but very interestingBy Karl ReutlingDated, but interesting introduction to the topic of a prior

civilization here. Lots of good ideas to research further. I would like to see a book that approaches this topic with more science from our new age of satellites and compute analysis.

Charles Hapgood's classic 1966 book on ancient maps is back in print after 20 years. Hapgood produces concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. He has found the evidence in many beautiful maps long known to scholars, the Piri Reis Map that shows Antarctica, the Hadji Ahmed map, the Oronteus Finaeus and other amazing maps. Hapgood concluded that these maps were made from more ancient maps from the various ancient archives around the world, now lost. Hapgood also concluded that the ancient mapmakers were in some ways much more advanced scientifically than Europe in the 16th century, or than the ancient civilizations of Greece, Egypt, and Babylonian. Not only were these unknown people more advanced in mapmaking than any people prior to the 18th century, it appears they mapped all the continents. The Americas were mapped thousands of years before Columbus. Antarctica was mapped when its coasts were free of ice. There is evidence that these people must have lived when the ice age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, ice age land bridge.

About the Author Charles Hapgood was a writer and researcher. He is deceased.
