**Rand McNally : Massachusetts State Map** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Massachusetts State Map:

By Snoosh I use a Garmin GPS when traveling in new areas but I always like to look a paper map before I go so if I hit a detour or some other common problem, I know the general layout and can react. It's also easier to plan a trip looking at a paper map vs a screen image. Finding paper maps is increasingly difficult, so I was happy to see this product, got it, and it works. I love my GPS unit and recommend them highly, but, (1.) while they are right about 95% of the time, they are terribly, terribly wrong about 5% of the time, taking you far afield for no apparent reason or to a completely wrong place, so if you haven't looked at a regular map, you will just cheerfully be delivered to the lions and wake up screwed; and, (2.) in general, I think there can be repercussions with everyone using GPS units since you get there without actually knowing how you did it, you have no idea where you are, and you miss something. Not only do you miss the ability to react quickly if a problem arises, you don't learn about the area, your options, etc. I won't give up my GPS but I won't give up using maps, either! And if terrorists ever manage to cripple our GPS satellites some day, I'll be fine, everyone else will be lost and dazed! I usually prefer American Maps to Rand McNally, but American Maps seems to have disappeared, and this Rand McNally is fine. 0 of 0 people found the following review helpful. Great classic By SteveCee23 An old standby - very detailed and easy to read. No batteries required! 1 of 1 people found the following review helpful. Free AAA map far superior ... By rav The most chopped up map I've ever seen. Impossible to sense continuity if planning a trip.
