Stuart McArthur : Mcarthur's Universal Corrective World Map Paper Folded Version 23 x 35 inches before purchasing it in order to gage whether or not it would be worth my time, and all praised Mcarthur's Universal Corrective World Map Paper Folded Version 23 x 35 inches:

1 of 1 people found the following review helpful. A silly, thought provoking mapBy ElfEarsI got this for my husband's high school history classroom. It's very silly (the flavor text is hilarious - AUSTRALIA, RULER OF THE UNIVERSE!!). If it pokes kids into thinking twice about how we view the world, it's money well spent.As a map, it's not great. There are few details, and it's completely missing Antarctica. Wish it were more useful as an actual map.6 of 6 people found the following review helpful. A map with an important story...By customerThis map has an important story behind its creation. The story is best explained by Bob from ODT maps in his short video available on youtube (search: "Stuart McArthur's Universal Corrective Map") . The map is great for the parents or educators that value critical thinking. Get it from ODT maps for the best in customer service.5 of 5 people found the following review helpful. I got it, I liked itBy Joyce D.I ordered this from ODT which shipped it quickly from Amherst, MA. I liked the map -- it's exactly what I wanted. What a fun way to shake up your perceptions about the world.

McArthur's Universal Corrective Map (23" x 35") Unique downunder viewpoint with cheeky Aussie humor. This map was created by Stuart McArthur of Melbourne, Australia. He drew his first South-Up map when he was 12 years old (1970). At age 15, he resolved to one day publish a map with Australia at the top. Six years later, while at Melbourne

University, he produced the world's first "modern" south up map and launched it on Australia day in 1979. It has sold over 350,000 copies to date
