My son and daughter lost interest in the storyline.2 of 2 people found the following review helpful. Easy to understandBy R.RussellGrand daughter loves this book. Easy to understand, I would say fun to read, lots of pictures with descriptive text. Would recommend for a 6-7 year old and up.1 of 1 people found the following review helpful. Great Book!By Melissa PetersonThis is the second Joan Sweeny book I have bought from this "Me" series. I also have "Me On the Map." Both are great. I teach second grade and the kids love it. Both books work really well for extensions with cross curricular projects. I highly recommend!

From School Library JournalKindergarten-Grade 2-A little girl approaching her seventh birthday introduces children

to the elements of time from seconds to minutes, hours, days, weeks, months, and years, using concrete examples from her life to illustrate the concepts. She can write an invitation to her party in a minute and it takes one hour to make a birthday cake. Brief discussions of a Viking ship, a photo of her great-great-grandpa, and her mother's wedding dress represent more abstract concepts such as millennium, century, and decade. Colorful, childlike drawings reinforce the explanations, and the back flyleaf presents a chart reviewing the concepts. A serviceable title.
