Delorme : Minnesota Atlas and Gazetteer (Minnesota Atlas Gazetteer) before purchasing it in order to gage whether or not it would be worth my time, and all praised Minnesota Atlas and Gazetteer (Minnesota Atlas Gazetteer):

It is very easy to use, I use mine every time even if I am only going 50 miles and typically would take a major highway. I have found some beautiful scenes along the way and it may only add a couple minutes to the trip. I bought this map for my daughter's family, they like to explore. You learn much more from one of these maps than from a GPS. You get to

see where you are in connection to say a major highway. The map will allow you to chose many alternate routes. You never know what you might see just around the corner. There are wonderful county roads throughout MN, but if you only use freeways or four lane highways, you never get to really experience our beautiful state.0 of 0 people found the following review helpful. We used the maps to explore the Superior shore north of Duluth and found them to be complete and accurate. Numbered Interstate exits are very helpful as are the numbered campgrounds, recreation areas and other features. One note of caution: Not all the green areas are state/national lands. This differs from the Delorme Michigan Atlas. I've had the Michigan book for several years and use it often. It's has held up well with no loose pages. This book seems to be of similar good quality.0 of 0 people found the following review helpful. This purchase replaces an older one that I used all the time. A truly valuable reference for topography, rivers, lakes, and roads.
