Outdated trekking map for the El Chalten areaBy sergejfl have purchased that map to plan my 6-day trek from El Chalten to De Agostini, then on to Poincenot, Piedras del Fraile (ex-Troncos) and Capri camps. The map is inaccurate in several respects: Jim Bridwell camp is now called De Agostini, the trail from Poincenot to Piedras del Fraile on the West of Rio Blanco is not mentioned, the trail to Laguna Pollone is not mentioned, the trail to Mirador Cerro Electrico is incorrectly represented, the shortcut to return from Capri to El Chalten is not shown. There's a MUCH more accurate map available in El Calafate and El Chalten called "Chalten Trekking Map", green cover, cost ARS \$45, with all the latest trails. Contact me if you need to know more.1 of 1 people found the following review helpful. Better Than NothingBy pen nameThis map is mediocre. The data is old, the printing is so-so, and the paper quality is low. However it is definitely better than nothing.1 of 2 people found the following review helpful. nearly totally uselessBy SFPthis is a waste of money because it lacks details to be really useful beyond what you will see when you get to El Chalten. the trails near el chalten are well marked with signs and have directions. other hikers are friendly and will give you directions. you can get a free map when you get there that is more useful. happy trekking.
