Chris Bernard : Moon Spotlight Massachusetts Biking before purchasing it in order to gauge whether or not it would be worth my time, and all praised Moon Spotlight Massachusetts Biking:

1 of 2 people found the following review helpful. really like this By Susan Reads Thanks for a great book. Clearly laid out and very thorough. Also from what trails I know, the information is accurate. I do like the elevation info. Sometimes a non-electronic guide is just what you want and you can always supplement information (printed maps to fold and put in your pocket) by going on line. One suggestion--a state map with all the trails marked so you can see

what is near what at a glance. Thanks for the book.

About the Author Chris Bernard is a freelance writer and photographer based in Southern Maine. When he's not at his desk, he's usually out on his bike, suffering his way up a hill or chasing his dog through muddy woods. One way or the other he's spent much of life on two wheels as a kid he raced BMX, in college he rode mountain bikes, and now he races road and cyclocross. He's often seen chasing a disappearing pack. He may not be the fastest rider, but he thoroughly enjoys every moment he spends on a bike. Chris has worked as a newspaper and magazine journalist and editor, a senior advertising copywriter, and a technical writer. Though he's called many far-flung places (including Alaska) home, he was born and raised in the northeast and always seems to return to his roots. So far he's lived in four of the six New England states, and his wife's family lives in the other two giving him plenty of chances to ride throughout the entire region. While researching this book, he got sunburned, muddied, bloodied, scraped, bruised, and rained on and enjoyed every second of it.
