The original hike we were doing was inaccessible due to a bridge being out of commission, so we were able to use this to see other hikes close by.0 of 0 people found the following review helpful. Good MapBy GeekFrogMap has proven accurate so far. Some connections and junctions are hard to see due to the scale of the map, but if it was any bigger it would be too cumbersome.0 of 0 people found the following review helpful. Good info, not what I expectedBy RogGreat guide but I really wanted more about the Timberline as a loop. Still has valuable info and perfect for local dayhikers.
