National Geographic Maps - Trails Illustrated : Mount Whitney (National Geographic Trails Illustrated Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mount Whitney (National Geographic Trails Illustrated Map):

0 of 0 people found the following review helpful. Could be better at a smaller ratio. By Katie T. A nice well made map for Mt. Whitney my only complaint is given it's focused subject that it's not a 1:24k map instead of the 1:40k. Most of this area is already covered by Nat Geo's Sequoia/Kings Canyon N.P. (#205) map. Ha;f this map is showing the Alabama Hills and over to Lone Pine CA. Due to my group flying into LAX and then driving up to the Whitney Portal we ended up starting our hike at about 9pm we also had no time to acclimatize to the altitude so a couple of us ended up taking it slow. It would have been nice to have had a larger detail to take more accurate compass headings to have gotten a feel for where along the trail we were, since the ridge line south of Lone Pine Lake and Thor's Peak were just large black masses that blocked out the amazing star field above us :) 0 of 0 people found the following review helpful. great map By Michele The Nat Geo trail maps are always very nice, this one is no exception. Needed this one for a more detailed look at the Cottonwood lakes area and it was exactly what we wanted. 2 of 2 people found the following review helpful. ... and Horseshoe Meadow which which make this map very useful if you are starting your hike from those areas By Richard Thomas This map includes areas further south such as Cottonwood Pass and Horseshoe Meadow which which make this map very useful if you are starting your hike from those areas.

Waterproof Tear-Resistant Topographic Map Mount Whitney is universally famous as the highest peak in the contiguous United States, as well as the highest point in California. National Geographic's Trails Illustrated map of Mount Whitney delivers unmatched detail and valuable information to assist you in your exploration of this beautiful region. Expertly researched and created in partnership with local land management agencies, this map features key areas of interest including Sequoia, Kings Canyon, and Inyo national parks; Sequoia-Kings Canyon and John Muir wilderness areas; South Fork Kern River; Diaz Lake; and Cottonwood Lakes. With miles of mapped trails including the popular Pacific Crest and John Muir trails, this map can guide you off the beaten path and back again in some of the most breathtaking scenery in the region. The clearly marked trails include mileage between intersections. A Mount Whitney trail profile inset showing the changes in altitude from various points along the Pacific Crest Trail Junction and the Whitney Portal Trailhead provides a handy tool for hikers. Scenic byways are noted for those wishing to take in the scenery by car. The map base includes contour lines and elevations for summits, passes and many lakes. Some of the many recreation features noted are campgrounds, trailheads, boat launches, swimming and fishing areas, and pack stations. A variety of helpful information about climbing Mount Whitney, Inyo National Forest, Sequoia and Kings Canyon National Parks, safety tips, and more is included as well. Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Other features found on this map include: Cirque Peak, Golden Trout Wilderness, Inyo National Forest, John Muir Wilderness, Mount Langley, Mount Muir, Mount Russell, Mount Whitney, Sequoia National Park, Sierra Nevada. Map Scale = 1:40,000 Sheet Size = 32" x 22" Folded Size = 4" x 7.5"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
