Mark A. Ross : Mountain Biking Southern California (Regional Mountain Biking Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mountain Biking Southern California (Regional Mountain Biking Series):

1 of 1 people found the following review helpful. Great book By Nicholas Gambino Great book, very informative. The authors give a great deal of info on many different trails, from directions to the trail, descriptions of the trail, ratings on

difficulty level, to cost of using the trails. Great book, a must buy for mountain bikers looking for some new places to ride in SOCAL.5 of 6 people found the following review helpful. Great variety of trails.By A CustomerI found this book to very informative and opened up a lot of new riding experiences for me. As a Ventura/Los Angeles local, I got bored with the same old trails. This book provided me a good foundation to begin exploring a world of new trails, all within a few hours of my own home. The best part is that with one book, I was able to find trails in towns like Morro Bay, Santa Barbara, Big Bear and San Diego where I can now take weekend trips and know where to ride. The trail descriptions gave me a strong sense of the terrain and level of difficulty and I found them to be very accurate.12 of 15 people found the following review helpful. A colorless, forgettable, unremarkable guidebook.By A CustomerThis book is quite disappointing. The maps are okay, the elevation profiles are helpful, but otherwise it's utterly bland--and one thing mountain biking shouldn't be is bland. There's no sense of what makes these mountain bike routes special (and if you've ever ridden in Southern California, you know how special the riding is). I think there are other guidebooks about Southern California that give you a lot more bang for your buck. There's no reason to settle for something as lazy, mundane, and obviously-tossed-together-just-to-make-some-cash as this.

Includes 69 of the best rides from the coastal bluffs of Morro Bay to the deserts of San Diego.
