Bruce Grubbs : Mountain Biking St. George/Cedar City (Regional Mountain Biking Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mountain Biking St. George/Cedar City (Regional Mountain Biking Series):

Too much has changed.0 of 0 people found the following review helpful. Beware: Outdated!By Jody InbodyThis book is terribly outdated. It took us to places that were not there anymore and the ratings for the ones that were are not consistent with what we found. The trails had changed as well and we were led astray on trails that still exist. I should have checked the copyright date and found a different book. We tore it up on our trip and just asked around for directions- which was much better than this book.2 of 2 people found the following review helpful. Indispensable guide to southwest Utah mountain bikingBy T. StrollI found Bruce Grubbs's guide essential to locating and navigating the trails of Washington and Garfield counties in southwest Utah. I rode the Green Valley, J.E.M., Thunder Mountain, and Paradise Canyon trails in May 2001, and particularly loved the Green Valley and Thunder Mountain trails. Be careful -- each of these trails has hazards and technical challenges.The book fits nicely in one's hydration pack or jersey pocket. One thing that Grubbs notes is worth repeating: you have to have an odometer to locate and navigate some of the trails he reviews. Otherwise you won't find them.Another good source of information is the trail reviews at Mountain Bike Review's website... And some local clubs and stores have useful websites with trail descriptions. Use a search engine to locate them.
