It arrived in good condition and the contents are very well written. Great guide for being in the back country year round. 0 of 0 people found the following review helpful. A great primer for Mountain Rescue By johnNSP's second edition Mountain Rescue is a great primer for those interested in surveying this topic. Many resources listed for more in-depth study. Lists in appendix is comprehensive, I particularly liked the medical equip and sample forms and charts. This text is not just for Ski Patrollers. I recommend this text for anyone who is interested in a career in SAR as well as anyone who routinely spends time hiking, skiing out of bounds, camping in remote areas. 0 of 0 people found the following review helpful. great until the rope chapter By Andrea

Erickson It is an easy to read overview of mountain travel. I thought all the chapters were clear, focused on basic knowledge. Really enjoyable book, learned a few things. Then I got to the last chapter, on using ropes for an angled rescue. There is no way you can figure out what they are talking about unless you already have experience with ropes, very frustrating.

Their core mountain rescue educational workbook, Mountain Travel Rescue (first published in 1995), was researched, written, and reviewed by volunteer members and experts from all over the country, and is designed to help ski patrollers train, rescue, and survive in mountain environments, at resorts, in the backcountry, and at any time of year. Mountain Travel Rescue is a valuable piece of mountain rescue equipment. In addition to new illustrations, this edition offers significantly expanded lesson sections, a new backcountry medicine section, and more. Mountain Travel Rescue: National Ski Patrol's Manual for Mountain Rescue is organized into four major sections: Survival, Travel, Backcountry Considerations, and Search and Rescue. It includes extensive appendixes, including medical equipment lists, a questionnaire, and a glossary and is a valuable tool for anyone who deals with search and rescue or is interested in mountain rescue basics.
