Marco Cruz : Mountains of Ecuador before purchasing it in order to gage whether or not it would be worth my time, and all praised Mountains of Ecuador:

1 of 1 people found the following review helpful. Great photos, inofrmative (albeit brief) commentaryBy A. TetraultWonderful photos and informative text. If you enjoy hiking in the Andes of Ecuador this book gives you a brief but interesting text of each of the major peaks. My only complaint is that the text is very brief. A few more photos of some of the lessor peaks would have made this even better. Even so, it's an enjoyable introduction into the beautiful world of mountaineering in Ecuador.
