There are significant trails in the geographic area that this map covers that are NOT on the map. As a result, turned a moderate 6 mile pack to Mt. Lowe Trail Camp into a 9 mile strenuous pack that lead us through Dawn Mine (which was really cool). However, If you want and accurate map that shows all trails (and who doesn't) - do not buy this map. I have never noticed this issue with other Harrison maps.0 of 0 people found the following review helpful. Poor qualityBy Alex Thayer MDCreated on a Macintosh. Looks like it was printed on a home printer with cheap paper. Skips many significant trailheads and street names. A lazy effort.0 of 0 people found the following review helpful. Great Detailed MapBy Vader ManVery detailed and large scale for an area that has a lot of overlapping trails. Updated to account for trail closures from the Station fire. Highly recommended.

A typical Tom Harrison Map, beautiful shaded relief contour, precise trail tracing and trail heads are precisely where they suppose to be. This 2013 contains all changes to trails that occur after a decade of fires, trail reconstructions, etc. Printed on waterproof and tear resistant material in beautiful colors. Mt. Wilson area gives access to many popular climbs and hiking trails. Some of the most popular are Josephine, Strawberry Peaks, Baden Powell and Mt. Lowe. Avilable only folded.
